RELEVANT COURSES

- Protection Using Linux
- Mobile App Development
- Web Services Prog. (API)
- Software Project Mgmt
- Algorithms Analysis & Design
- Advanced DataBases

TECH SKILLS

- ASP.NET (MVC, CORE)
- OOP in Java
- JavaScript, C#, HTML, CSS
- Python
- Data Structures, Algorithms
- FireBase
- SQL (MySQL, Oracle Database, SQL*Plus)
- Git
- Web Development
- Android app development

LANGUAGES

- English (Fluent)
- Arabic (Fluent)
- French (Elementary proficiency)

EDUCATION

Bachelor of Computer Science   2022-2025
Al-Ahliyya Amman University

PROJECTS

ExploreXpress: Seamless Travel Booking Web Application

A dynamic MVC-based web application for streamlined travel planning and booking, offering users destination, hotel, and transport exploration, with an admin interface for managing travel data.

Technologies Used: ASP.NET C#, Javascript, HTML, CSS.

War of Word

Developed a Wordle-inspired game that offers multiple categories, three difficulty levels, and integrated hint functionality. The game was designed with a focus on efficient data structures to manage word selection, difficulty scaling, and hint distribution. By leveraging optimized algorithms, the system dynamically adjusts the game's complexity, providing a seamless and engaging user experience. The use of structured data ensured quick access to relevant word sets, category-specific challenges, and real-time game state updates, resulting in a well-organized and scalable solution.

Technologies Used: Java, HTML, CSS.

Weather Web

Developed a dynamic web app integrating OpenWeather API for real-time weather data, with Firebase authentication for secure login, registration, and password recovery. Used Firestore to manage user data with unique username validation.

Technologies Used: Java, Javascript, firebase, HTML, CSS.

ACHIEVEMENTS & CERTIFICATES

Achieved top rank among Computer Science students in the first year.

CCNA (Cisco Certified Network Associate).

My current research focuses on Artificial Intelligence and its applications in emerging technologies.
